PROFILE INFO

Hello, I'm a dedicated game developer with a passion for creating engaging gameplay experiences. I specialise in C# and C++ development within Unity and Unreal, bringing both creativity and technical precision to every project. I thrive in collaborative environments and enjoy solving complex problems to deliver polished, player-focused results. Continuously learning, I'm committed to growing my skills and contributing effectively to game development teams.

EXPERIENCE

GAMEPLAY PROGRAMMER ABYSSAL DREAD

2022- 2023

This was my first experience working with Unreal Engine 5, which significantly expanded my understanding of C++ and its integration with the engine. I refined my use of Git, developed a stronger grasp of enemy behaviour trees, and further improved my collaboration skills through close teamwork.

GAMEPLAY PROGRAMMER BITTER EXTINCTION

2021 - 2022

Working on this project allowed me to deepen my understanding of Unity, C#, Git, and Agile methodology. I gained experience contributing to a long-term project, learnt the importance of effective task prioritisation, and saw firsthand how continuous testing supports a stable and polished development process.

GAMEPLAY PROGRAMMER CONJOINED

2020 - 2021

This project was my first major team-based development experience and a valuable learning opportunity. I gained hands-on experience with Git and collaborated using Agile methodologies to contribute effectively to a shared game development workflow.
