## PROFILE INFO

Hello, I'm a dedicated game developer with a passion for creating engaging gameplay experiences. I specialise in C# and C++ development within Unity and Unreal, bringing both creativity and technical precision to every project. I thrive in collaborative environments and enjoy solving complex problems to deliver polished, player-focused results. Continuously learning, I'm committed to growing my current skills as well as learning new ones, such as video editing with Premiere Pro.

## EXPERIENCE

### VIDEO EDITOR

2025 - Now

#### NOAH WERTH FILM & PHOTOGRAPHY

My first experience editing for a professional wedding videography business, where I handle large volumes of footage, sync audio, switch between camera angles, and create highlight reels. I adjust audio levels and continue to develop my skills in Premiere Pro, file management, timeline editing, and workflow efficiency.

### GAMEPLAY PROGRAMMER

2022 - 2023

#### ABYSSAL DREAD

This was my first experience working with Unreal Engine 5, which significantly expanded my understanding of C++ and its integration with the engine. I refined my use of Git, developed a stronger grasp of enemy behaviour trees, and further improved my collaboration skills through close teamwork.

### GAMEPLAY PROGRAMMER

2021 - 2022

#### BITTER EXTINCTION

Working on this project allowed me to deepen my understanding of Unity, C#, Git, and Agile methodology. I gained experience contributing to a long-term project, learnt the importance of effective task prioritisation, and saw first-hand how continuous testing supports a stable and polished development process.

### GAMEPLAY PROGRAMMER

2020 - 2021

#### CONJOINED

This project was my first major team-based development experience and a valuable learning opportunity. I gained hands-on experience with Git and collaborated using Agile methodologies to contribute effectively to a shared game development workflow.
